

Year 2's

**fantastic
trip to
Gatton
Park.**

The lady read us a story all about minibeasts before we went on a nature hunt. She showed us pictures of all the creatures we had to look out for!

We followed the nature trail
and looked at lots of pictures
of food chains along the way.

We looked under logs,
in bushes, beneath
stones, in trees and on
paths.

We recorded everything that we found. You wouldn't believe how many creatures we saw.

We made sure we put everything back carefully after we had looked at them.

**We even
found a frog!**

**The weather was
so nice that we
had a picnic
lunch.**

We investigated
some pond water
and found lots and
lots of little water
creatures.

We found newts,
water spiders,
water snails and
lots more.

We looked
carefully at them
through our
lenses.

**We went
pond
dipping!**

**Investigating,
recording and
sorting our findings**
