

The Lowther Reading Spine

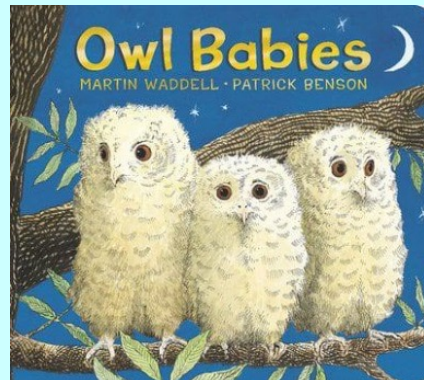

- Welcome to our Reading Spine, a core of books which will create a living library in children's minds. Working together, children, parents, carers and staff will use the spine to ensure that Lowther's pupils are introduced to a wonderful selection of high-quality books during their journey through the school.
- Teachers from each year group have chosen key texts which will inspire, excite and motivate children as readers. Whether they are reading a story independently, listening to an adult read to them, studying a book in class or reading in a small group, our children will find that the books of the Reading Spine have been chosen to fire their imagination and foster a love of reading that will help them throughout their lives.

The Lowther Reading Spine

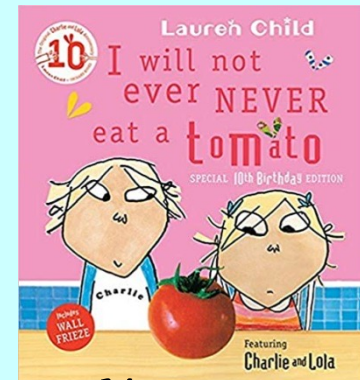

- The idea of a Reading Spine was created by Pie Corbett, the renowned English guru, to help schools build a store of the very best books for children. Our selection includes classics, new titles, poetry, works from authors with diverse backgrounds and challenging texts that will help children engage at a deeper level with reading, the most crucial and liberating of all skills.
- Click on the images below to find the Lowther Reading Spine books for your chosen year group and feel free to dive in at home. Happy reading!
